Mission Statement

Vision

We are a non-profit company whose aim is to secure long-term employment for people disadvantaged in the job market. In doing so, we provide a significant contribution towards ensuring social solidarity.

People

The jobseekers we support, as well as their professional and social skills, are at the heart of our activities.

In our work, we draw on the diverse experience and knowledge of our key employees, and promote their personal and professional development.

Values

Our cooperation and advising are based on appreciation and respect. We actively work towards gender equality and oppose all forms of discrimination.

Environment

We are committed to the environment by actively promoting sustainable practices and inspiring our participants and partners to act in an environmentally responsible manner.

Technique

Our most important asset is the diversity of the people we work with. To capitalize on this diversity, we facilitate an open exchange of knowledge, experiences and opinions at all levels.
